Bring \$10 materials fee, to be collected by professor Laura Hoffman on 4/11/19.

**Discover Photography, Part II: Continuation of DPI; lecture/critique/demo/field trip**

A life-enrichment photography course that builds on Digital Photography I. Learn to use lighting and exposure controls to make digital photography your *art*. We'll cover lighting, how time affects photography, explore low light photography techniques and how to create portrait photography which conveys a mood. Enjoy a class field trip offering hands-on experience.

Lab time is built in for individual instruction and demonstration. Coursework will include demonstrations, image-rich presentations, and spotlights on featured artists, a guest speaker and in-class constructive critique. Students will be introduced to new photographers and artists to inspire them to develop a body of work that reflects that individual student's unique spirit and vision.

◆ **Objectives**

- Design compelling images with purposeful composition.
- Creative use of exposure and camera controls to achieve optimal exposure, lens / focal length choices, shutter effects as well as lighting, perspective and depth of field.
- Gain further perspective through a guest speaker and spotlights on various masters of photography
- Hands-on experience in the field, on location and in-class camera work, as well as critiques and a portfolio review will make this a comprehensive digital photography class.

◆ **Exercises:**

This is a five-session class. Students will receive handouts leading to resources they can begin using immediately. Assignments are designed to be fun, so that students can apply lighting and composition techniques to create memorable photographs and push growing photography skills to the next level of expertise, for more creative control.

◆ **Requirements**

- Camera (dSLR/mirrorless/bridge camera with hot shoe), sturdy tripod, access to a computer.
- Must submit photography to an on-line photography gallery for review.
- Back up all work on flash drives or external hard drives.
